

TEWKSBURY ROBOTICS FRC TEAM 1474 - TITANS

TEWKSBURY MEMORIAL HIGH SCHOOL

Dear Potential Sponsor,

We are a group of highly motivated students participating in the FIRST® Robotics Competition (FRC) program from Tewksbury Memorial High School. We are seeking financial support to participate in the FIRST Robotics program which is the premier Science, Technology, Engineering and Math after-school activity at TMHS.

FIRST® was founded in 1989 to inspire young people's interest and participation in science and technology. Based in Manchester, NH, FIRST designs accessible, innovative programs that motivate young people to pursue education and career opportunities in science, technology, engineering, and math, while building self-confidence, knowledge, and life skills. For more information, please go to <http://www.firstinspires.org>

How Can You Help?

With an annual budget of \$25,000, participation in the FIRST robotics program can be an expensive endeavor. Your financial support is greatly appreciated because we are primarily funded through the generosity of corporations, local businesses and individual sponsorships. All donations are delivered to FIRST or TMHS and are used for program and event registration costs, tools, equipment, materials and robot supplies.

If you cannot offer financial support, there are other ways you support the team.

- **Tools, equipment, supplies, materials and services**

The team is engaged in all forms of wood working, metal working (aluminum), 3d printing, laser cutting, vinyl cutting, electronics wiring, code writing, project management and public relations.

- **Mentors**

Volunteers from industry are the life-blood of the team. Experienced engineering and business professionals support the team by providing a level of education that is not available in a typical classroom setting by mentoring students to learn new skills.

The team is seeking assistance from the community that will allow us to be competitive and attain the ultimate goal of participating in the FIRST World Championship. We invite you to invest in the great young minds of the future by contributing to our team.

If you are interested in making a non-financial donation, volunteering as a mentor or getting more information, please contact the team's coach, Scott Morris at frcteam1474.coach@gmail.com or 978-808-4639. Thank you for your time and consideration. We look forward to building a partnership with you!

Respectfully,

FRC Team 1474 - Titans
